## ***Company History***

Fundraising Brick has been laser engraving bricks for twenty years. In fact, Laser Light Technologies, Inc. was the first company to develop the process of laser engraving on bricks. Having created this technology, our developments over the years have made us extremely reliable in processing engraved bricks with efficiency and accuracy. Our extensive experience enables Fundraising Brick to provide a superior product at a very competitive price. Fundraising Brick was established in 1996, at the time a division of Laser Light Technologies, Inc., and was founded based on the process of laser marking bricks.

## ***Personal Bio***

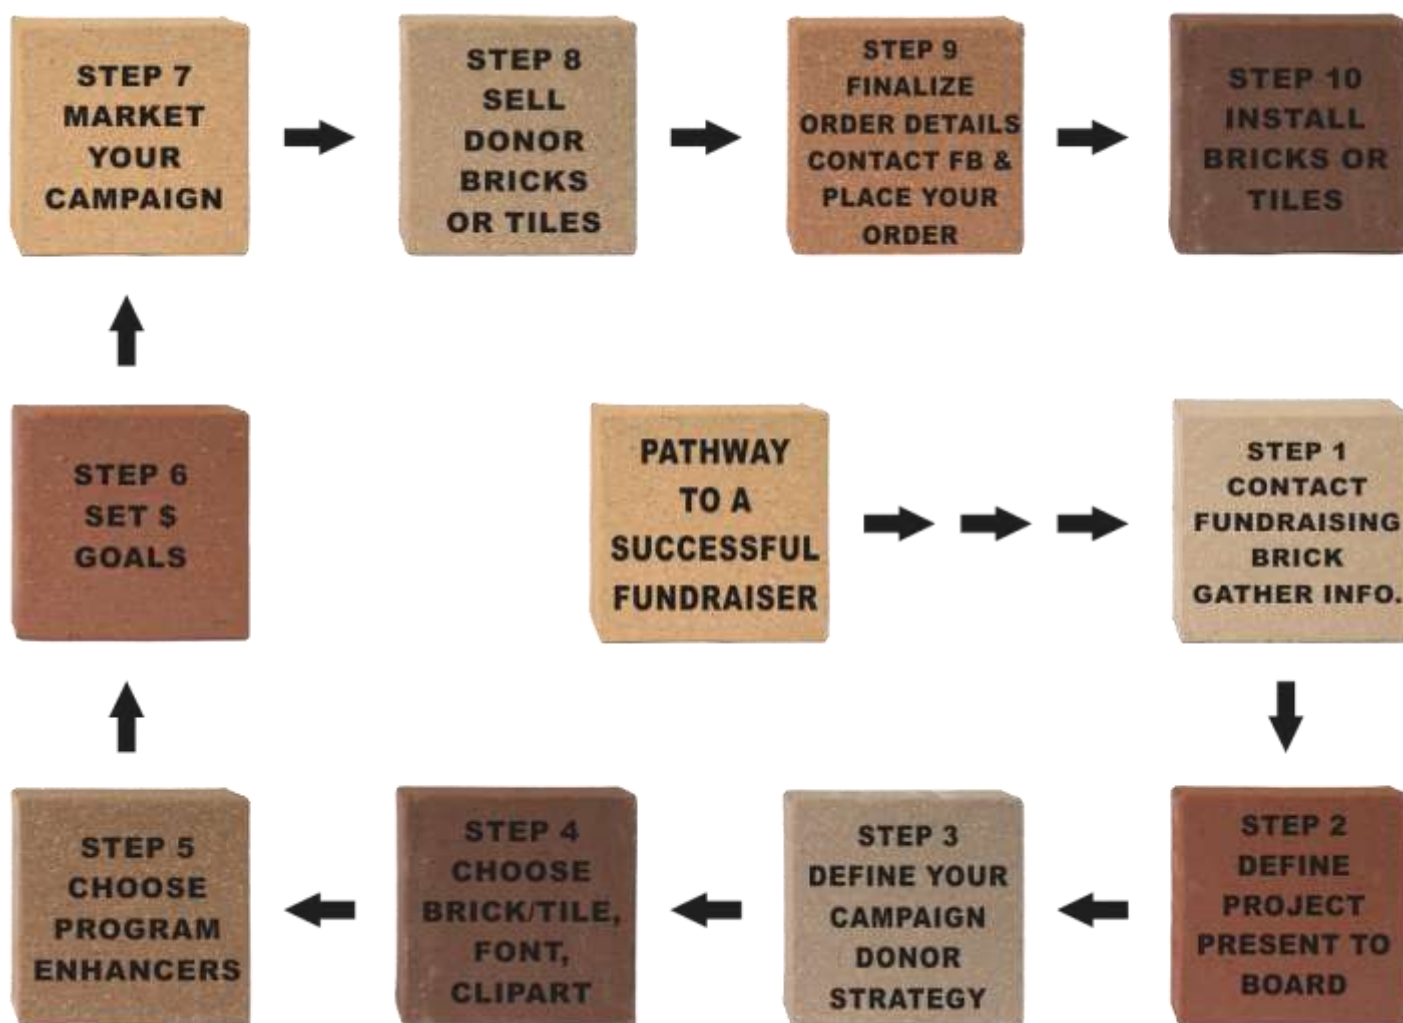

My name is Jennifer Stemmler, and I have recently purchased the founding division for laser marking bricks from Laser Light Technologies, Inc. The new company name is Fundraising Brick LLC. Having been employed with Laser Light Technologies for over 17 years, the last five years of my employment with the company I held the position of Quality Engineer. When Frank Hannan, owner of Laser Light Technologies, Inc. decided that he was selling the Brick Division, I was more than excited to take over this division and bring the company to a new level. My lifelong dream has been to own and operate a business. I have worked on multiple types of different laser systems and have a vast knowledge of the brick laser systems used to engrave the bricks. I was involved in every aspect of the brick division during my employment at Laser Light. In 2008, I obtained ISO 9001-2000 Certification for Laser Light Technologies, Inc. During my employment with Laser Light, I received Lean Six Sigma Green Belt and Black Belt training. Through ASQ, I obtained my Lean Six Sigma Green Belt Certification.

American Society for Quality – Six Sigma Green Belt Issued 12-5-2009

Beta Sigma Phi – Member Number 1101989 President of Chapter Alpha Eta Gamma

# BRICK\$ FOR BUCK\$

Choosing Fundraising Brick is the first step to a successful engraved brick fundraising campaign. Unlike our competitors, we are completely committed to you and your efforts in conducting a successful and profitable fundraiser. We will provide you with every tool to get you started and to keep you on track until that last brick is put in. Our fundraising experts have put together worksheets, timelines, packets and marketing materials that will save you time and money. And, above all, our fundraising team is available to you at any time for guidance and support.

We know that fundraisers are no easy feat and it really helps to have a confidante to help you along the way! Let Fundraising Brick be that confidante for your organization or foundation. Why re-invent the wheel, let our experience and expertise guide you through the fundraising process. Utilize our knowledge and **FREE** services to create a successful brick or tile campaign.

# **Why Fundraising Brick**

## **What sets us aside from our competition?**

**1.** Unlike most of our competition, Fundraising Brick does **NOT** require contracts and there are no hidden fees with our services. We are certain that your organization will choose Fundraising Brick as their engraved brick provider and do not rely on tying you down with a contract. Our exceptional customer service and support throughout your project from start to finish will influence your organization to choose us as your engraved brick provider. We are upfront and honest about all costs involved in your fundraising project. We want your organization to have a successful brick or tile campaign and can help you every step of the way.

**2.** Fundraising Brick warrants, through its Limited Lifetime Warranty, that its brick laser engraving processes will be of good quality and workmanship and will not fade, chip, oxidize, peel or separate from the brick, paver or tile for the life of the surface of the engraved brick, paver or tile. Fundraising Brick requires that the brick, paver or tile manufacturer meet all ASTM (American Standards of Testing Materials) standards for quality, durability and longevity. This warranty is limited to the repair or replacement of any laser engraving processes onto a brick, paver or tile meeting ASTM standards. Any laser engraving process that prove(s) defective will be repaired or replaced by Fundraising Brick provided that such defect is due to faulty material or workmanship on the part of Fundraising Brick and not the result of tampering, vandalism, misuse, abuse, improper installation or maintenance misapplication, natural disaster or acts of God, excluding normal environmental conditions such as rain, sleet, snow and freeze/thaw conditions.

**3.** We are committed to providing the lowest prices in the industry! We want our customers to receive the best pricing and quality available from any brick engraving company. If you find a competitor with a lower price, we will **MATCH IT** and still include all of our other **FREE** services. All you have to do is provide us with a written quote

from our competition and if their price is lower than ours, we will **MATCH IT, GUARANTEED.** We are confident that our pricing is extremely competitive and we are dedicated to helping organizations like yours earn as much funding as possible for your brick or tile fundraising project.

**4.** 24/7 Service - Our fundraising team is available to you at any time for guidance and support. We realize that most fundraising project leaders are volunteering for their organization and have a limited amount of time to spend on these projects during regular business hours. This is why our highly experienced team is available 24/7, yes including evenings and weekends to assist you with your special fundraising project. This sets us aside from our competition and is a service that only Fundraising Brick offers to our clients. Call us anytime at 855-BRICKS4U - because we know things happen and questions come up at the oddest times. Our team is at your service!

**5.** Last but not least, because Fundraising Brick cares about you and your project. Our experienced staff is dedicated to making you fundraiser a success. We are the pioneers in this industry. We have more knowledge and expertise in laser brick engraving and fundraising than any of our competition.

**100% SATISFACTION GUARANTEED ALL THE TIME, EVERYTIME!**

# ***Online Ordering - Fundraising Made Easy***

Online order form that can be linked or embedded to your website allowing your donors a convenient method to order laser engraved bricks online. The Internet provides convenience and accessibility and is an extremely effective way to drive sales. The online form allows you to manage your fundraising project with ease.

## ***How it works***

Fundraising Brick will generate/create an interactive campaign fundraising page and manage your Internet orders. Our web development team will generate a custom web page that links to our website from yours for placing the Internet orders. Yes, this service is **FREE**.

The customized ordering page will allow your customers/donors to order the laser engraved bricks directly from your website. The link will take them directly to the online order form, which is linked to our storefront online. The form allows them access to order a brick, enter their text to be engraved on the brick, and make a secure payment online using our PayPal account.

Fundraising Brick will handle the rest. Fundraising Made Easy makes your project headache and hassle free. It is as simple as it sounds.

When your fundraiser is complete, Fundraising Brick will engrave the bricks ordered for your fundraiser, and ship them to you for installation.

## **Fundraising Made Easy - 1 Step to Online Ordering:**

All that you are required to do for our online ordering system is setup a PayPal account for your organization. The PayPal account that you have setup is where the funds earned from online ordering will be transferred. You can then transfer the funds from PayPal to a bank account or directly withdraw the monies earned.

Your program directors can be emailed all of the order details, including the following:

- Donor's Contact Information
- Engraved Inscription
- Size of Brick
- Purchase Price

This allows you to easily track your orders and manage your campaign.

The forms are custom generated to fit each individual customer's needs.

We will be happy to create your customized campaign fundraising order form page and manage your Internet orders. Contact us at [info@fundraisingbrick.com](mailto:info@fundraisingbrick.com) or call toll free at 855-BRICKS4U and our staff will assist you in generating an interactive form to link to your website for your fundraising project. You are just a click away from a successful campaign.

## ***Testimonials***

### ***A Lifesaver***

"You are a life saver. I am so thankful you live close enough, our guys could pick them up today. Thanks again for all of your help. I hope we don't have an emergency rush order again, but if something comes up, it is nice to know you have my back!"

Millie G.

LAF & Community Cares Administrator

### ***Timely & Professional***

"Jenny, [name withheld] will be taking over the responsibilities of Brick Chairperson, effective 5/17. I'd like to say how much I've enjoyed working with you this year, and how much I appreciate how timely and professional your company has been in fulfilling our orders."

Susan L.

The Stuart Society  
Museum of Fine Arts  
St. Petersburg, FL

### ***Kind & Professional***

"Thank you, Jennifer, you are so kind and professional. It is great doing business with you. Until next time. All the best."

Elaine T.

Public Relations  
Sandwich Glass Museum  
Sandwich, MA

### ***Anxious to Get Bricks Installed***

"I received the bricks yesterday and they all look great! I am anxious to get them installed in the current memorial at Piper High School. Thank you for your help and if I know anyone wanting to do a similar project, I will let them know about your business."

Jackie K.

Piper High School  
Kansas City, KS

### ***Willing & Accommodating***

"Thank you! Thank you! Thank you! I appreciate your willingness to accommodate our request and please know you have played a huge part in Commencement at Silver Lake College of the Holy Family - the entire Class of 2013 is grateful."

Amy E.

Silver Lake College of the Holy Family - Wisconsin

### ***Above & Beyond***

"Thanks again for everything that you've done. You have gone above and beyond since we first started doing business with you. The brick has arrived and looks great. Thanks again!!"

Christine Schwab, Development Assistant

Cardinal Ritter Senior Services

### ***Timeliness & Great Care***

"2012 was a pleasure in our 'Paving the Way' efforts due mostly to your timeliness and great care in working with us. Our thanks."

Virginia Webb

Jewish Geriatric Services

### ***Profitable Project***

"Hi, Jennifer! We absolutely LOVED all the brick work you did for us. This was quite a project for us and it made us a lot of money to help with a new room in our backyard area. We give your name to people when they inquire about [the bricks] for their own fundraising events We have a beautiful Path of History...in front of our Museum in Kernville."

Vicki Middleworth, Project Chairman

Kern River Valley Historical Society

### ***Professionalism & Prompt Service***

"Fundraising Brick helped our company by producing 300+ custom laser etched bricks for a fraternity house in college Park, Maryland. Fundraising Brick represents professionalism and was very prompt in all matters. I highly recommended Fundraising Brick if you are doing a fundraiser of any kind or a special order."

Nicholas Philiou

College Park, MD

### ***Attentive, Sharp, Engaged & Helpful***

"I first approached Fundraising Brick inquiring about a quote on brick engraving for a fundraiser my organization was doing for Mother's Day. The initiative had been started by another colleague who left for another job and had not passed the task on, leaving the project untouched for about a month or so. Needless to say, by the time I picked up the assignment we were on a time crunch..."

From the very beginning, Karen and her associates at Fundraising Brick were attentive, sharp, engaged, and helpful. Karen understood that we were on limited time and sprang into action, guiding me through the intricacies of our lengthy order. Since this was our first time embarking on this type of project, I needed a little guidance and Karen was incredibly helpful, never seeming frustrated or irritated, a rarity in customer service

105 Industrial Drive ■ Hermann, MO 65041 ■ PH 855-BRICKS4U (855-274-2574) ■ PH 573-486-5515 ■ FAX 636-600-5352

these days. She tolerated our last minute orders and corrections with grace and patience. Not only was her manner helpful, she got the job done fast and with proficiency, allowing us to organize a successful fundraiser. As an organization, focusing on the empowerment of women, our brick engraving and garden dedication ceremony was especially poignant on Mother's Day as we and our donors honored the women who have made a difference in our lives. Fundraising Brick helped us make that happen. We now have a revamped garden and a gorgeous brick patio in front of our Administrative Building where our neighbors and donors may find sanctuary, take time for memorial, or even just have lunch or visit with a friend. I have thoroughly enjoyed my experience with Fundraising Brick and look forward to working with them again!"

Darby Beckman, YWCA South Hampton Roads  
Norfolk, VA

### ***Quality***

"The patrons who bought bricks love the quality especially those businesses that purchased logo bricks."

Lance Roberts, Chester High School  
Chester, SC

### ***Courteous & Friendly***

"It was a true pleasure to work with your company. Everyone I spoke with or emailed was prompt, courteous, and friendly. I look forward to working with you again in the future."

Pat Hall, Greyhound Friends, Inc.  
Hopkinton, MA

### ***A Steady Inflow of Brick Orders***

"Our memorial is called the Path of History and to date we have cleared over \$10,000 profit on our venture. The bricks are placed on concrete pads with 12 to 15 bricks mortared to each. The pads are lined up to form a path in the Museum front yard passing various artifacts, flowers and ending under a beautiful Desert Willow tree. After the initial flurry of brick orders we have found that as visitors come by, or members come through, we have a steady inflow of requests for more bricks each month. We can truthfully say, that this project, with the engraving and bricks from your company has been one of the most successful and ongoing projects we have undertaken in the past several years. It sure beats cookbooks and bake sales as a fund raiser.....By a long shot..."

Vicki Middleworth, Path of History - Kern River Valley  
Wofford Heights, CA

### ***Helping Make Dreams Into Realities***

"It is with great pleasure that I send you this thank you letter. On behalf of the Pinal County Peace officer's Memorial, Inc., Fund Raising Committee, I would like to say thank you so much for sending the project pack to us. The step-by-step instructions and clear graphics, is exactly what we needed to get our project started. I would also like to give special thanks to your Brick Division Manager. He has always been available to answer any and all questions that have come up, and with his knowledge of your product and fund raising, he has given us many new ideas that have

helped us to get our brick project off the ground and begin to realize that our project goal was going to become a reality.

We have already sold over 400 bricks, and we anticipate that our goal of selling 2700 bricks will be accomplished. That will be enough to build our planned life size bronze memorial for our fallen police officers and with your continued help and support, we will never forget the officers who have paid the ultimate price for protecting our community. Once again, thank you, the staff at Fundraising Brick. Without you, our dream would not become a reality."

Mike Minter, Co-Chairman

Pinal County Peace Officers Memorial, Inc. Fundraising Committee  
Florence, AZ

### ***Helpful Service***

"Your staff was very helpful in the process once we started the actual order. The bricks were great and our site is wonderful. Thanks for your service!"

Michele Wilbur, Soldiers & Sailors Memorial  
Hutchinson, KS

### ***Going Out of the Way to Help***

"Mr. Bill McBryde has been so helpful and he is very knowledgeable of your company and always makes me feel comfortable with any questions I might have. He goes out of his way to help."

Representative from Darton College  
Albany, GA

### ***Customer Service***

You are doing a wonderful job! It's a pleasure working with you.

Jessica U.

Regional Program Manager-Rural  
Girl Scouts of Eastern Missouri

Thanks, Jenny. You are a star!

Eliane T.

Public Relations  
Sandwich Glass Museum

The bricks look great!

Sincerely,

Jackie R.

Fenton Parks and Recreation  
River Chase

That's great, Jennifer! What fast service!

Brenda O.

Van-Far Alumni

Thank you, Jennifer...You've been great to work with.

Christine

St. Christopher Inn

Brick arrived yesterday-THANK YOU! Looks great. I appreciate the great customer service. You're the best! Many thanks! May I repeat? You're THE BEST  
Mary A.

Development and Community Relations  
Hospice at Greensboro

Jenny, Thank you so much! I truly appreciate your promptness.

Mary S.  
Ursuline Academy

Thank you so much...for being so accommodating.

Elaine T.  
Sandwich Glass Museum  
Sandwich, MA

Thank you, Jennifer. I appreciate all of your help and hard work on this project.

Lorraine G.  
Director of Parks and Recreation, Town of Easton

Jenny, thanks so much for rushing this through so quickly!

Susan L.  
The Stuart Society-Museum of Fine Arts

Kudo's for a job well done as always!!!

Dan & Jan  
Holy Name Parish

## ***OUR SERVICES***

### ***Marketing Assistance***

Our team of fundraising experts have decades of experience in promoting and bolstering support for brick fundraising campaigns in a variety of industries and businesses. We work hard to help you get the most donors we can and getting them as excited about the project as we are.

At no additional charge, Fundraising Brick can customize a wide variety of advertising and marketing materials that will help you inform and promote your efforts. This includes: Pledge Sign-Up Forms, Brochures, Order Forms, Flyers, Mailers, Donor Letters, Radio/Television Scripts...the list goes on. We have a large library of templates that we can customize for you by adding logos, pictures, fundraiser details, mission and vision statements, customized order forms or web links. All of this is **FREE** when you order through Fundraising Brick, no hidden costs, no hidden fees!

# Tri Fold Flyer Examples

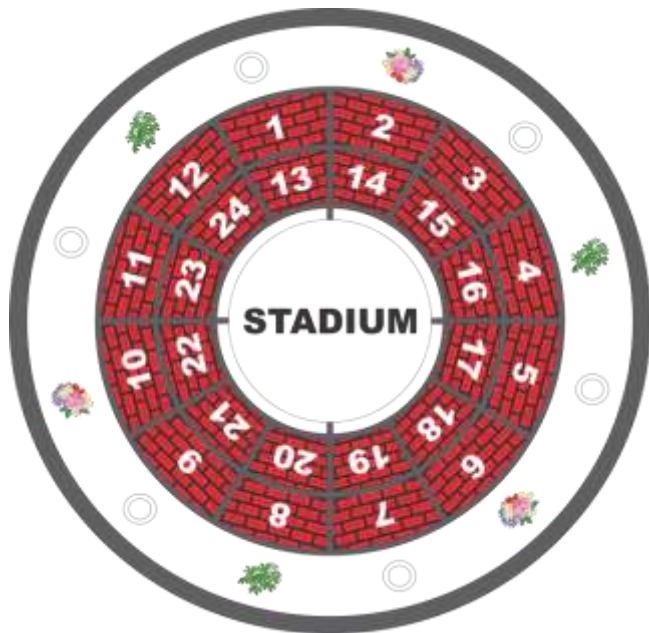

Bi-Fold Example

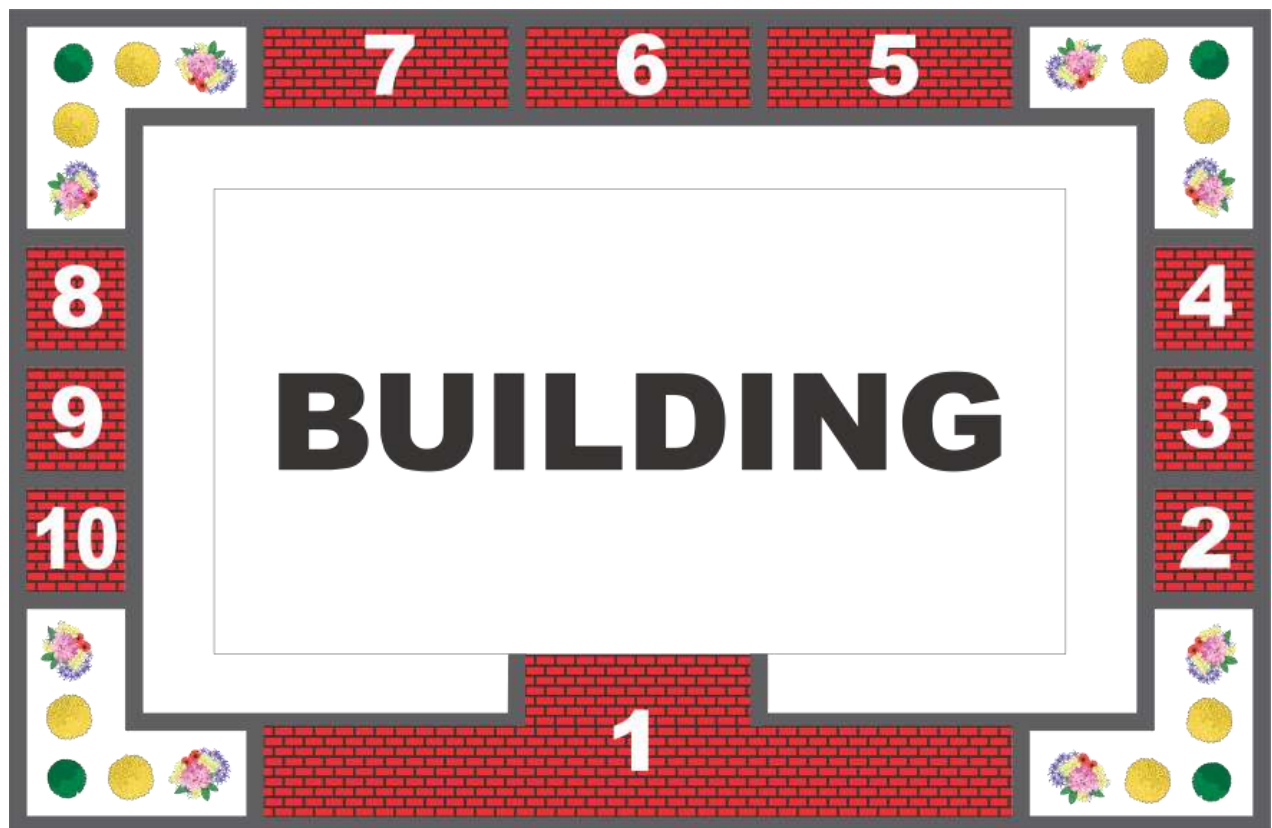

Single Page Example

## Brick Locator Map

For some of our larger engraved brick installations in stadiums and outdoor memorials, we offer a Locator Map for donors so they can find their special engraved brick. Having a Locator Map is like having a treasure map and going on a treasure hunt. It is so much fun to find your brick with your special message engraved on it! Ask today about the possibility of a Locator Map for your project.

We will mark it and  
Then Map it. You will  
Be provided with a  
Section number and  
a row and column number  
for all of your donors. We will  
provide the list of names with  
the location to your installer.  
It is as easy as it sounds.

## On Time Delivery

As part of our commitment to service and quality, we honor our promise to you of coming through with your order and within the timeframe agreed upon. If necessary, our dedicated team will work around the clock to meet your deadline.

Regardless of your location in the contiguous United States, we guarantee that we get you your order faster than any of our competitors. We know that, with your order, you have many people counting on you to come through with their engraved messages and dedications to loved ones, and we want to be the company that helps you with making those messages and dedications come alive - and on time - every time.

## Standard Ordering Process

Fundraising Brick will provide you with all of the necessary order forms and text documents that are needed to make your fundraising project a success. The text documents are user friendly and in MSWord or MExcel format. Our highly qualified staff can assist you with all of your fundraising needs including customized order forms, online interactive order forms, brochures, flyers, and much more.

Text Document Example for two line and three line bricks – complete the lines of text and clipart information in the table provided below and submit along with the order to Fundraising Brick. The laser engraved text will appear as typed into the text document below. If you type it in ALL CAPS, it will be engraved in ALL CAPS. If you type in Upper and Lower, it will be engraved in Upper and Lower case.

Please type each line as you want it to appear on the brick. <b>PLEASE NOTE: LIMIT 20 CHARACTERS PER LINE</b>				
<b>Customer Name:</b>		Fundraising Brick	<b>Please Specify 4X8 or 8X8</b>	4X8 Bricks
<b>Brick #</b>	<b>Line 1 -20 char. max</b>	<b>Line 2 -20 char. max</b>	<b>Clipart Information Only</b>	
Brick1	Best Team Ever	SF 49ers	San Francisco 49ers Logo	
Brick2	TIM JONES	"FAN FOR LIFE"	San Francisco 49ers Logo	
Brick3	In Honor Of	John Waymeyer	No Logo	

Please type each line as you want it to appear on the brick. <b>PLEASE NOTE: LIMIT 20 CHARACTERS PER LINE</b>				
<b>Customer Name:</b>		Fundraising Brick	<b>Please Specify 4X8 or 8X8</b>	4X8 Bricks
<b>Brick #</b>	<b>Line 1 -20 char. max</b>	<b>Line 2 -20 char. max</b>	<b>Line 3 -20 char. max</b>	<b>Clipart Information Only</b>
Brick1	In Memory Of	Betty Smith	1938 - 2012	No Logo
Brick2	Jason, John,	Joe, & Jim	Reinhardt	No Logo
Brick3	In Memory of	Fred Jones	49ers Fan	No Logo

**No More Typing – Eliminate The Typing From Your Project Today! Save Time, Energy, And Money. Use Our Brick Inscription Page Online.**

For those of you that do not wish to re-type your donor's names into the text files, allow your donors to enter their text directly from our website. We will generate a campaign name and access code for your organization that allows your donors to select their campaign and type their desired inscription directly from our website. Yes, it is that easy. Fundraising Brick will handle the rest. The inscriptions are emailed directly to Fundraising Brick and we input them into the necessary files for laser engraving on the bricks. We will email you a list for approval prior to engraving the inscriptions on bricks. This service omits re-typing errors and spelling mistakes and saves time, energy, and money.

If the customer wishes to have a custom logo laser engraved, we will need to determine graphic layout for the engraved bricks. All of the bricks that will have the logo engraved will be laser etched with the same layout. NOTE: There is a \$5.00 additional fee for bricks laser marked with the custom logo. You need to get a custom quote for each logo and the price is subject to change due to the complexity of each graphic.

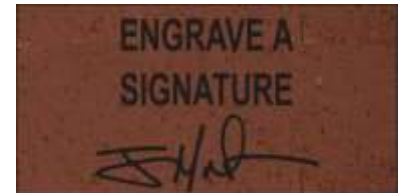

Layout #1 4X8

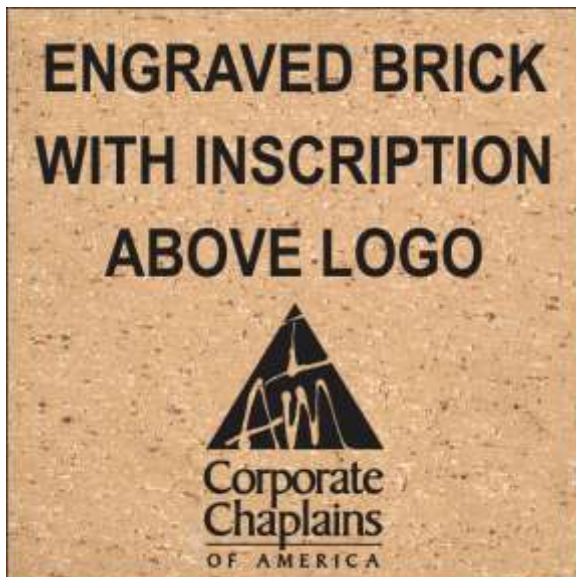

Layout #2 4X8

Layout #3 4X8

Example Layout #3 8X8

Example Layout #4 8X8

## ***Standard Payment/Terms***

Fundraising Brick's policy is to receive payment prior to shipment of product.

## ***Delivery***

Standard delivery is 2 to 4 weeks from the time you place the order. For orders over 1000 please allow 3 to 6 weeks. Lift Gate Service; this service is only needed if you do not have a way to remove the bricks from the delivery truck. There is an additional \$75.00 fee for this service. If a lift-gate is required for delivery, please specify on the brick order form.

# **BRICK WARRANTY**

Fundraising Brick LLC guarantees the laser engraving for the life of the brick. Please see the attached sheet on Independent Lab Testing.

Fundraising Brick warrants, through its Limited Lifetime Warranty, that its brick laser engraving processes will be of good quality and workmanship and will not fade, chip, oxidize, peel or separate from the brick, paver or tile for the life of the surface of the engraved brick, paver or tile. Fundraising Brick requires that the brick, paver or tile manufacturer meet all ASTM (American Standards of Testing Materials) standards for quality, durability and longevity. This warranty is limited to the repair or replacement of any laser engraving processes onto a brick, paver or tile meeting ASTM standards. Any laser engraving process that prove(s) defective will be repaired or replaced by Fundraising Brick provided that such defect is due to faulty material or workmanship on the part of Fundraising Brick and not the result of tampering, vandalism, misuse, abuse, improper installation or maintenance misapplication, natural disaster or acts of God, excluding normal environmental conditions such as rain, sleet, snow and freeze/thaw conditions.

## ***Laser Engraving vs. Sandblasting***

Sandblasting was first patented in the late 1900s and has had many uses over the decades in a variety of industries. Present day brick sandblasting is a multi-step process where a stencil is created first. Then the stencil is applied to the brick and placed in a chamber where an abrasive material is shot out of a high-powered machine to "blast out" the brick material. The removed brick material creates a deep crevice that is later filled with a contrasting epoxy or paint to make the mark stand out against the brick's surface.

When you first get your new sandblasted brick, it will be beautiful. Initially, the design and the lettering will be crisp and clean. The contrasting epoxy/paint-filled mark will

stand out against the surface of the brick. However, the filler will begin to deteriorate after even a season's worth of exposure to extreme heat or cold, the sun, rain or snow. If you have an indoor installation, exposure to the drying effects of a building's heating and ventilation system will also degrade the filler material.

The sandblasting method is more complex and much less durable. To achieve a contrasting mark, the material of brick is blasted out of the surface leaving a deep groove. The etched out area of the brick is then filled with an epoxy or paint to create a contrast on the brick surface. Over time, these added materials weather and break down, leaving an unclear, deteriorated, and in some cases an unreadable mark.

### ***Newly Sandblasted Brick***

### **Even a newly sandblasted brick has flaws (missing ink in the top leg of the "F")**

That once beautiful sandblasted brick will lose its epoxy or paint filler making the design and message unclear and difficult to read without the contrasting material. Dirt will get embedded in the now exposed crevices. Money will need to be spent for time and labor to clean out the dirty brick crevices. The exposed lettering and design can also become a hazard for heels from shoes and for those using assistive walking devices like canes and walkers.

**Sandblasted Bricks After One Year (Wall Installation – No foot traffic)**

**Sandblasted Bricks After One Year (Walkways with foot traffic)**

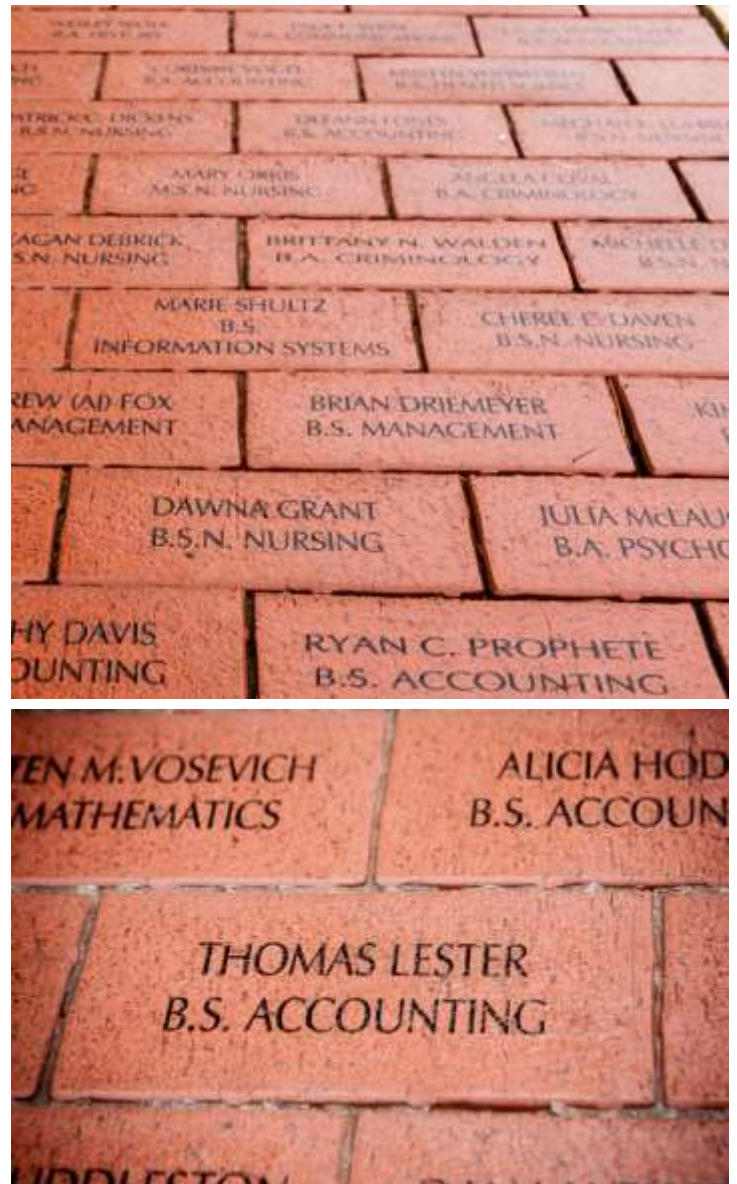

## **Laser Engraving**

Our laser engraved bricks are more durable and are safer than sandblasted bricks. We permanently engrave bricks with our unique laser technology. What happens in the engraving process is called laser vitrification, or just vitrification for short. The laser directs an intensely hot beam onto the brick's surface and changes the composition of the clay into a dark, glass-like mark that stands out on the engraved brick or etched tile. For our customers, this means endless possibilities because we can offer a wider variety of creative ideas by adding clipart, artwork, custom graphics, logos, signatures, depictions and fonts to your custom engraved brick or tile designs.

### **Laser Engraved Bricks Installed in 2008 in 2005 (Photographed in 2013)**

### **Laser Engraved Bricks Installed (Photographed in 2013)**

## **Laser Engraving Process**

Laser engraving is a natural and permanent process. The laser beam interacts with the brick, changing the composition into ceramic by intense heat. This process is also referred to as laser vitrification. The engraved laser mark on the brick is smooth, hard, and adhered permanently to the surrounding brick material. No paint, ink or epoxy fillers are added to achieve contrast. The brick laser marking process has been tested for durability for harsh weather conditions. Click here (add a link) to see the brick durability standards for additional details.

Choosing laser engraving will guarantee a high-quality and far superior product than any of the engraving or etching processes in the market. Contact us today at 1-855-BRICKS4U to speak to a member of our team and to get started on your project.

## **Laser Marking is Maintenance Free**

The laser vitrification image is not affected by ultra-violet light, and is completely resistant to fading. Unlike other brick engraving processes, such as sandblasting, this low maintenance product requires minimal care. Simply wash away dirt and debris to expose a crisp, undamaged mark. The mark will never lose its clarity or quality.

## **A Brick is "GREEN"**

Laser Engraving is a natural and environmentally responsible option when revitalizing your community. No additives. All natural. Long lasting.

What are you looking for? Decide for yourself! Make the best decision for your organization's campaign (or program?) and its donors

# Installation Layout Design

If you're like many of the groups we've worked with, you know the size of the space where you want to put the installation or memorial. You have strong feelings about the message you want your installation to convey, and, you probably have seen other brick installations or memorials that have inspired you. Now, you're asking, "What can we do with our brick installation?" No need to look any further. Our design team will work with you to customize a brick installation design that will encompass your vision and your organization's message - to all fit within the spacing you provide us. We have designed laser engraved brick installations for sidewalks, gardens, walls and other structures, both indoors and outdoors. Our staff can assist you with the design and layout for your brick fundraising project installation. We can calculate the space required and amount of bricks needed for your project.

Let us inspire you!

THE TILE MAGNET & GLASS MAGNETS REQUIRE CUSTOM PRICING THAT IS ORDER SPECIFIC. THE PRICING IS BASED ON THE QUANTITY, BACKGROUND COLOR, AND DESIRED ENGRAVING ON THE MAGNET. PLEASE CONTACT FUNDRAISING BRICK TODAY FOR A CUSTOM QUOTE. RECEIVE YOUR QUOTE - 24 HOUR TURNAROUND.

**FOR MORE DETAILS ON VARIETY OF BRICKS/PAVERS/TILES/PAINT COLORS/AND OUR FUNDRAISING CAPABILITIES, PLEASE CONTACT US AT 855-BRICKS4U!**

### **Program Enhancers:**

Fundraising Brick offers a variety of program enhancers. A program enhancer can assist in boosting your sales and earning additional funding for your project. Donors like to receive a memorabilia to show that they helped fund your special project. We offer Certificates of Authenticity, Mini Engraved Pavers, and Engraved Magnets that can all be used to enhance your fundraiser.

The Miniature Brick Pavers and the engraved magnets make excellent program enhancers. They can be sold in addition to the 4X8 and 8X8 pavers and given as recognition to the donor. The miniature bricks and magnets can also be used as a standalone fundraiser.

### **4X8 Replica's Miniature Brick**

Miniature Brick 2 1/2" X 1 3/8" X 1" - Red

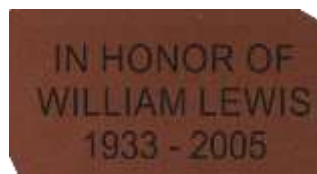

Recommended sell price for a Miniature 4X8 replica is \$25.00

### **8X8 Replica's Miniature Brick**

Miniature Brick 3" X 3" X 1" - Red

Recommended sell price for a Miniature 8X8 replica is \$50.00

## **Full Size Replica Bricks**

At Fundraising Brick we offer you all the tools to make your fundraiser the most successful campaign it can be.

For the same cost as bricks for installation, our **Replica Bricks** come with rubber feet on the bottom so that the donor can safely display them on a shelf, desk, table, or floor.

Not only will your supporters/donors be able to own a little piece of the project, it is a great way to increase sales for your fundraiser.

We suggest that **Replica Bricks** be priced at approximately half the price of your installation bricks. For example, if you are selling a 4X8 paver for \$100.00, then the replica should be offered to the donor for \$50.00. If you are selling the 8X8 paver for \$250.00, then the replica should be offered to the donor for \$125.00.

Replica Bricks and Tiles cost you the same as regular donor bricks/tiles and count towards volume discounts. Shipping is included in the price if the replicas are shipped to the fundraiser with the rest of your order and distributed by your organization.

Replica bricks and tiles shipped directly to the donor will be charged \$10.00 extra for shipping and handling and will be packed in an attractive single brick/tile shipping box.

## Online Virtual Brick Example Page

Fundraising Brick has a virtual brick designer on our website. This allows your donors to view what their engraved brick will look like. They will be able to select the brick shade, size, font, and clipart. We are excited to introduce this new online feature and hope that your donors will utilize this tool to visualize their laser engraved brick.

### Design and Personalize Your Brick or Tile Paver

## Magnets

Glass and Tile Magnets can be engraved with the donor's inscription, your organization's logo, a school mascot/logo, business information, clipart, and much more. A school, club, university, stadium, church, zoo, gift shop, store, can sell the magnet products. They can also be used as a business promotional item or a give away for a fundraiser or special project. The possibilities are endless. Proudly display the magnets for your family, friends, and co-workers to see on your refrigerator at home, a school locker, or a file cabinet at work. Available in three different sizes to fit your organizations needs.

***Glass Magnet Sizes are 1" Square, 1 3/8" Square, and 1 7/8" Square***

***Tile Magnet Sizes are 1 3/8" Square***

## Donor Certificates of Authenticity

A certificate of authenticity can be mailed to your donors that purchased a brick paver for your organization. The Certificate of Authenticity establishes that a brick was purchased and installed with your organization. The certificate can be proudly displayed in an 8x10 frame for family and friends to see.

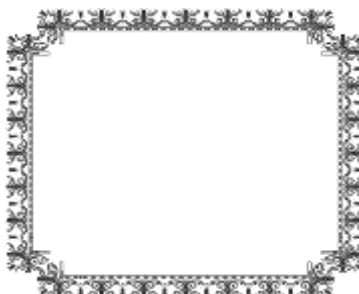

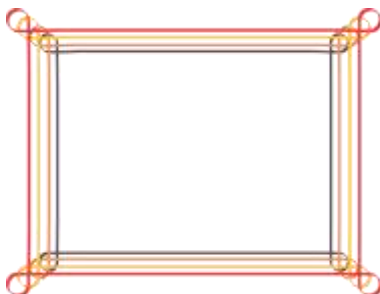

Fundraising Brick will customize a certificate specifically for your project. We have a large variety of frame choices and color options. Contact us today for more information.

## Sample Certificates of Authenticity

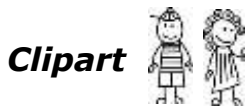

### **Additional Frames – You can choose any color for your frame**

Fundraising Brick can design a custom frame for your organization if you do not see what you want from our current selection.

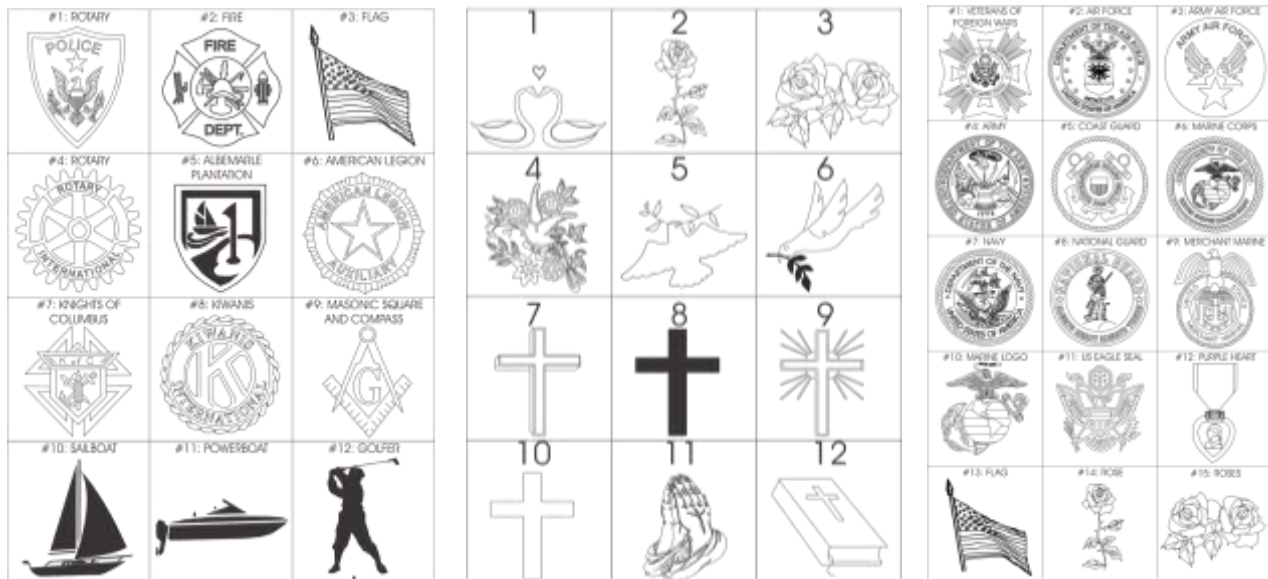

Much of our ability to create a product that people absolutely LOVE is from our huge selection of clipart and fonts.

Our superior laser engraving capability enables us to offer an infinite combination of fonts and graphics because we can just put about anything on a brick with our laser engraver! Much of the clipart we use can be categorized by industry or the type of fundraiser. After you have decided on a limited list of special clipart that you would like your donors to use with their inscription, we will put together a customized menu of "allowable" clipart for your donors to choose from during the ordering process.

Just let us know that you want this premium service and we will add it to your order at no additional cost!

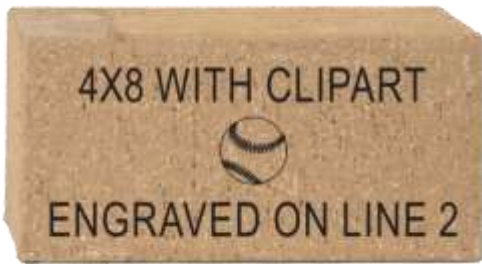

### Examples we assembled for clients

Customers are allowed one clipart engraved with the text for no additional fee. Fundraising Brick has developed recommendations that are shown below if you choose to allow your donors to select clipart to be engraved on their brick. Fundraising Brick is committed to working with our customers and developing an option that will work for you and your organization. Please keep in mind that these are just recommendations based on our experience to enhance the appearance of your brick. If your organization does decide to allow clipart for your donors, you will need to determine a layout option for the engraved bricks. All of the bricks that have clipart engraved will be laser etched with the same layout.

Please contact us for additional options or customization regarding clipart and we will be happy to accommodate your organizations requirements.

## ***Recommendations for Bricks Engraved With Clipart***

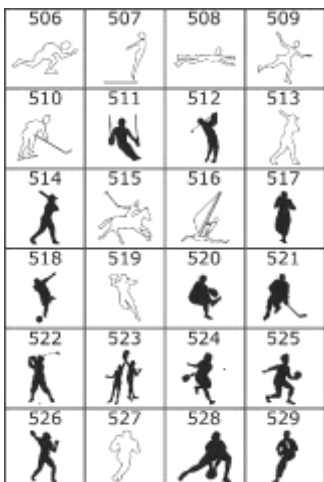

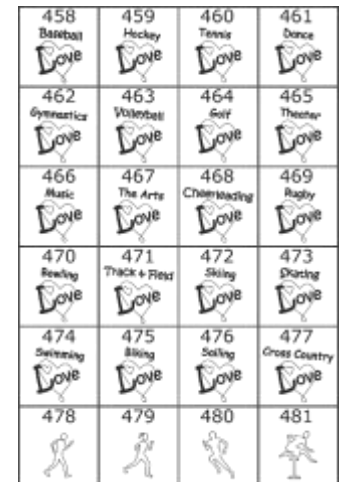

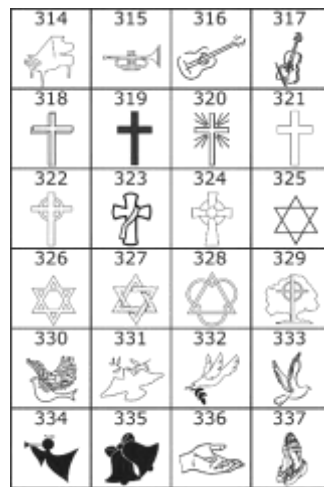

- ❖ Clipart engraved 1" tall
  - ❖ Layout #1 & 2
    - Engrave 2 lines of text with clipart on either line 1, line 2, or line 3
    - 20 characters per line
  - ❖ Layout # 3, 4 or 5
    - Engrave with 3 lines of text with clipart in the top left/right corner or to the left/right of the text
    - Limit 17 characters per line
- ❖ Clipart engraved 2" tall
  - ❖ Layout #6 (Military Emblems/Seals)
    - All Military Emblems/Seals must be engraved 2" due to the detail in the graphic
    - Engrave with 3 lines of text clipart to the left or right of text
    - Limit 15 characters per line
- ❖ Clipart engraved 1" tall (8X8)
  - ❖ Layout #7 & 8
    - Engrave with 6 lines of text with clipart above or below the text
    - Limit 20 characters per line
- ❖ Clipart engraved 2.75" tall (8X8)
  - ❖ Layout #9 & 10 (Military Emblems/Seals)
    - All Military Emblems/Seals must be engraved at least 2" due to the detail in the graphic. It is recommended that if you offer military graphics along with other clipart images that you engrave all of the clipart 2" tall for uniformity.
    - Engrave with 4 lines of text with clipart above or below the text – **We recommend that you only engrave 3-4 lines max with the military emblem clipart. If you choose 3-4 lines of text instead of 6 lines of text, we can enlarge the clipart to 2.75" in size.**
    - Limit 20 characters per line

If you do not see the clipart that you want from our library of over 1500, contact us and we can generate custom clipart for your project. To see an enlarged view of our clipart, please refer to our PDF clipart library file.

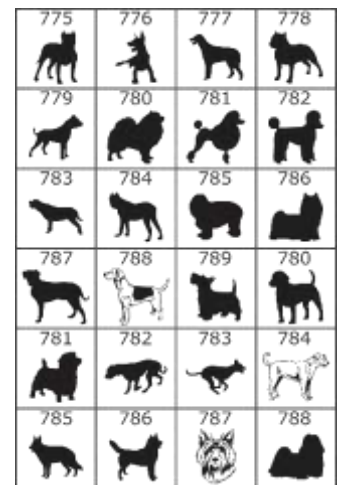

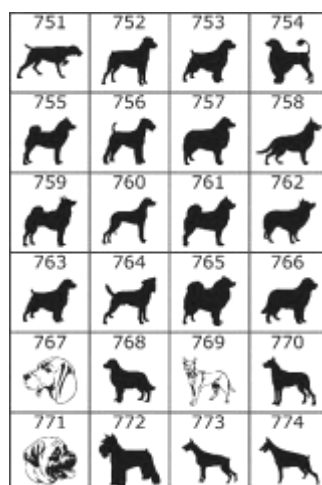

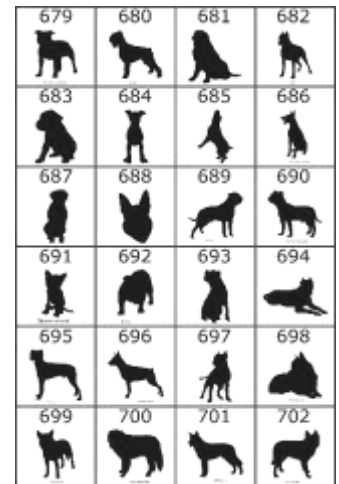

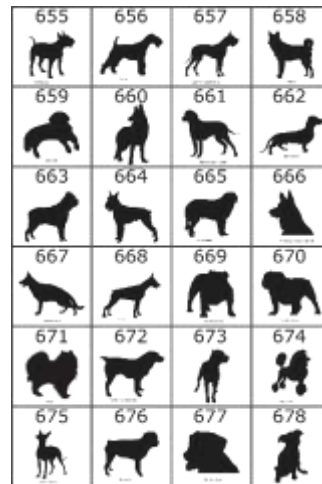

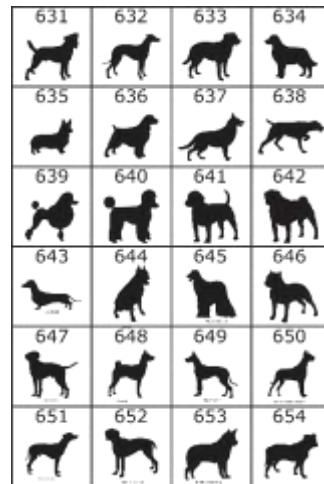

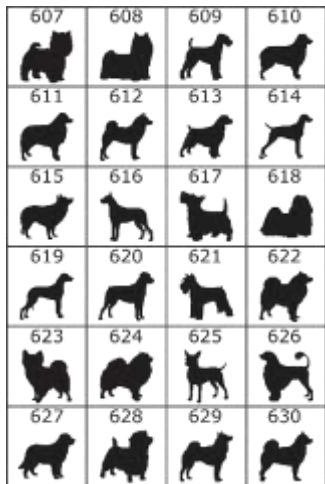

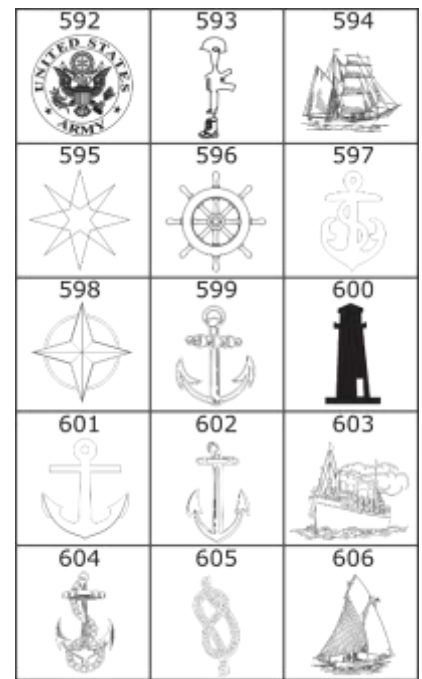

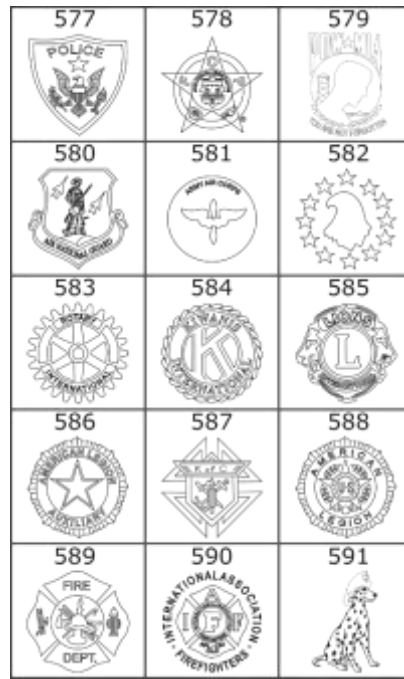

NOTE: There is a \$5.00 additional fee per brick to have more than one clipart laser engraved.

# Brick Durability Standards

Our laser vitrification (laser engraving) process was subjected to a simulated fifty-year weather resistance test. Independent Testing Laboratories, an independent company, conducted the test. Samples of our laser engraved bricks were placed in three weather climates: Freeze-thaw cycling (hot and cold), ultra violet rays (sun), and salt spray environment (snow, ice, rain). Even under the most extreme weather conditions, the laser engraved bricks will stand the test of time, ensuring that you will never need to replace your brick.

## Independent Testing Laboratories - St. Louis, Missouri

Test Process Report #95-02-00405

A sample of each 3 styles of brick was selectively subjected to (1) freeze-thaw cycling, (2) continuous exposure to carbon arc light in an Atlas Fade-o-meter, and (3) continuous exposure to a salt spray environment. The results of each exposure is described below:

### FREEZE-THAW CYCLING

A sample of each style or shade was subjected to freeze-thaw cycling which consisted of first completely soaking the brick in water and then placed into a cold box maintained at -20F. Subsequent to a six hour exposure in the cold box, they were then transferred directly into an oven, maintained at 160F, for a 15 hour period. This cycle was repeated daily with the exception that the heat cycle was continued over the weekend. The freeze-thaw cycle was repeated 51 times in the course of the exposure. It was noted that no visual change in the appearance of the engraving was detected in the bricks when compared to the control samples.

### CARBON ARC EXPOSURE

A specimen of each style brick with laser engraving was subjected to direct ultra violet light exposure generated by a carbon arc in an Atlas Fade-o-meter. This stimulated exposure to direct sunlight similar to that experienced at high noon at the equator. The bricks were oriented in the chamber with the engraved surface facing the arc at a distance of 12 inches. The bricks were continually subjected to the carbon arc light for a 37 day period. No visual change in the appearance of the laser engraving was noted in any of the bricks following this exposure.

### SALT SPRAY EXPOSURE

One specimen of each style of engraved brick was subjected to a salt spray cabinet exposure for a period of nine weeks (63 days). Upon removal from the cabinet, the bricks were rinsed in water and examined. Visual inspection at the conclusion of the exposure period revealed no change in the appearance of the surface etchings as compared to that of the control samples.

## EVALUATION OF RESULTS

Based on the text results obtained in the course of this examination, it is our opinion that the engravings produced in the surfaces of the three styles of bricks submitted, were all comparable and were all resistant to the environmental extremes created during the test exposure. The laser engravings appeared quite durable and resistant to weathering under the conditions of testing.

# General Brick Installation Instructions

**These are general guidelines only. Check your paver manufacturer's recommendations before laying pavers. Fundraising Brick is not liable for paver installation; these are only general recommendations.**

## TIPS:

- ❖ Clay soil can be particularly unstable over time. You can add stability to your project by covering the bottom and sides of the excavation with a geotextile fabric stabilizing layer before you add your base.
- ❖ Also instead of using a concrete toe, you can place wet Portland cement and base mixed together under the border pavers. For instance: you are using a 6"x9" paver as a soldier border for a driveway. You excavate out the compacted base the entire length under the border, mix in Portland and water. Then set it back in the area. Place the soldier paver back into the wet concrete mix and hammer back to level. You have basically just created a 9" wide concrete beam that is not visible to the viewer. If it does crack, it is rare that a 9" wide concrete beam buried below grade would move.
- ❖ If you have sandy soil, you may be able to mix 1 94-pound bag of Portland cement into each 30 square feet of your soil as a base. Do this only if you're installing a walkway or patio that will receive only foot traffic.
- ❖ In southern climates not subject to freeze thaw, a concrete toe can be used in place of edge restraints, and for some projects, such as driveways, a toe is not preferred. Install the toe after you have already installed the pavers.
- ❖ Spray your base gravel lightly with water to moisten it. This will make it easier to compact the base correctly.

## SOIL TYPES:

### Sandy Soil

- ❖ Most brick patios are installed with layers of both sand and rock for the longest lasting installation, but in some cases it isn't necessarily a requirement. If you are living in an area that already has sandy soil, you can generally use a layer of crushed rock underneath the brick. The sandy soil already provides a base of support, and as long as it is packed firm under the installation, there are no concerns.

### Clay Soil

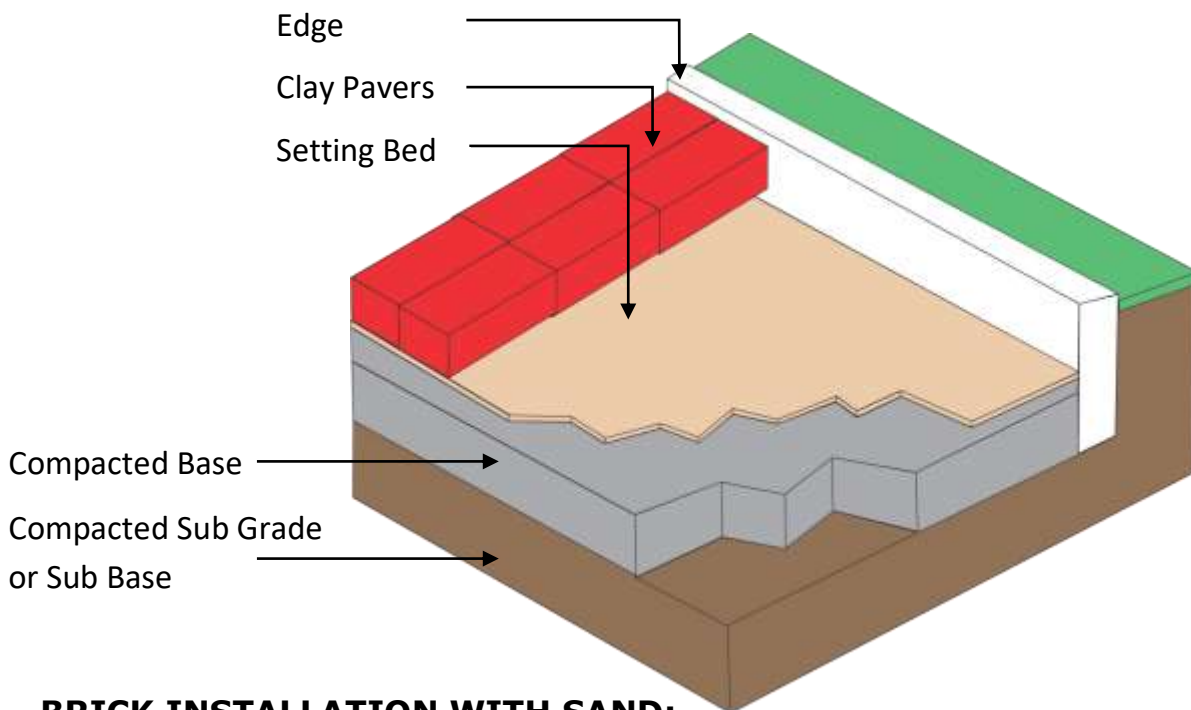

- ❖ While rock isn't necessarily affected by water, sand is. If you live in an area that has a clay soil base you will need to use more rock than sand. This is because clay does not drain well and that backwater can soak into the sand and cause it to harden and eventually soak up clay elements. Once this happens you will have pieces that can occasionally stick up due to hard sand underneath, so sand should be kept to a minimum in these cases.

## Hard Soil

- ❖ As long as the soil is dry and hard-packed, you can use a base of rough sand. It will need to be thick enough to support the pavers, but because the ground is dry and excess water isn't an issue you don't need the rock for drainage, and the sand can sufficiently support the patio above. You can also add a layer of rock under the sand if you want extra protection.

## Climate

- ❖ The climate can affect the type of sand you use on top of your rocks. Because sand can soak up water, it is susceptible to freezing in the winter, as well as the freeze/thaw cycle in the late fall and early spring months. When water hardens it expands, which forces patio pavers up off the patio. Your best option in these cases is to use the roughest sand you can find or the finest type of rock gravel to allow for adequate drainage.

## BRICK INSTALLATION WITH SAND:

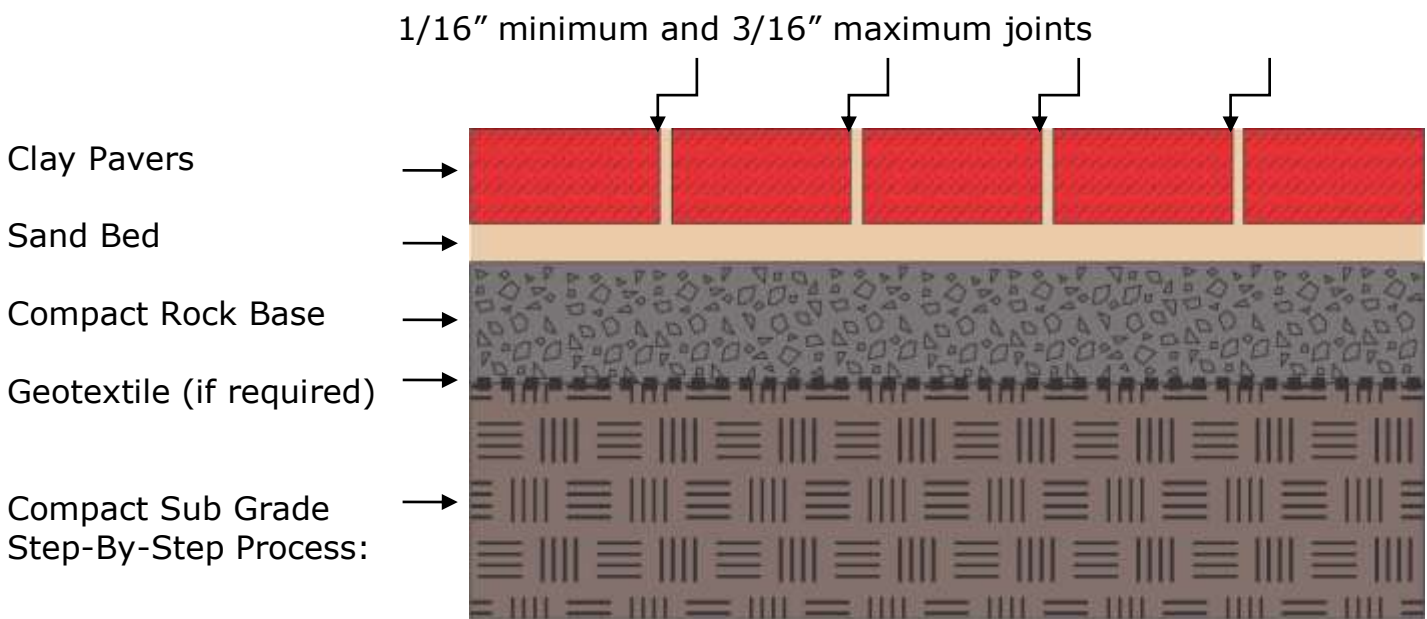

### Tools and Equipment:

- Shovel for excavating the area to a depth of 4-12". For larger jobs, a skid loader or backhoe can be used.
- Tamping machine to compact base and pavers.
- Chisel and hammer to split pavers or, for larger jobs, a [brick saw](#) can be used.
- Wheelbarrow or skid loader to haul sand, gravel, and pavers.
- Rubber mallet for positioning pavers.
- Level
- Stakes and strings for marking perimeter of area to be paved and to provide a guide for leveling pavers.
- Screen board to level base and sand before setting pavers.
- Broom to sweep sand into spaces between pavers.

## Site Considerations:

The area chosen for paving should be level with a ½ - 1% slope to provide for drainage. Avoid areas where tree roots might cause damage to the paved area. Recently disturbed soils or soils high in organic matter should be removed and replaced with compacted base material.

Most brick pavers are 2 ¼" thick. Add this measurement to your base depth to calculate how deep you should excavate. For example, for a driveway you should excavate a total of 8 ¼" from where you expect the surface of the pavers to be when the job is complete (assuming that you are using a 6" base depth and using 2 ¼" thick brick pavers).

## Step-By-Step Process:

**1.** Excavate the area to be paved using a shovel or skid loader. The depth needed will depend on the intended use for the paved area. If the area will be used for foot traffic only, you will need a 4" base of crushed rock. For heavy traffic or a lawn tractor, 6" is necessary. For driveways, 12" of crushed rock will be necessary. Construction fabric can be used to stabilize the existing soil before the base material is added. Add to that ½-1" for sand and the depth of the pavers themselves to determine the depth to be excavated.

**2.** Fill the excavated area with crushed rock or class 5 fill. Begin by spreading an even layer of rock 3-4" deep. Use the tamping machine to compact the rock. Add another 3-4" layer and compact again. Continue this layering process until the desired amount of base is in place and fully compacted. Be sure each layer is level before adding the next layer.

**3.** Install the desired edging around the perimeter of the area to be paved.

Be sure measurements are accurate so pavers will fit properly. When determining the finished size of the paved area, choose a size that will require as little cutting or splitting of pavers as possible.

**4.** Add a ½-1" layer of coarse sand over the crushed rock base. The sand covers the small rocks found in the base material making leveling easier. Stabilize it by tamping or moistening with water to avoid future settling. Using a screed board, smooth the surface of the sand so that the entire area is level with the edging. The sand surface should be at a height so that when pavers are placed on top, they will initially sit approximately ¼" above the finished elevation.

**5.** Set the pavers on the sand in the desired pattern. For larger areas, position string to crisscross the area to assist in aligning bricks correctly. Pavers should be set tightly against one another; bricks can be set with 1/16" minimum and 3/16" maximum joints between them. If the final row of pavers must be cut to fit, use a brick saw to cut to the desired size or split them using a hammer and chisel.

**Note:**

When square-edged pavers or pavers without lugs are laid with sand joints, care should be taken to ensure that they do not make direct contact with or lip under adjacent pavers. A minimum 1/16 in. (1.6 mm) wide sand-filled joint should separate each clay paver to minimize potential chipping. However, the maximum joint width should be no more than 3/16 in. (4.8 mm) to minimize the potential for horizontal movement under vehicular traffic. If pavers with spacers and/or a rounded or chamfered edge are installed, there is less potential for direct paver contact. When lugs are used, the potential for creep is reduced.

**6.** When all bricks or pavers have been set, spread sand over the entire area and using a broom, sweep sand around until all the crevices between the pavers or bricks are filled.

**7.** Run the tamping machine over the surface of the pavers until the crevices are full of sand.

**8.** Spread more sand over the surface and sweep it into crevices between pavers. This step may need to be repeated over the next couple of weeks.

### **BRICK INSTALLATION MORTAR:**

- 1.** Make wood spacers from ½-inch by ½-inch boards, cut to 3-foot lengths with a circular saw or a hand saw. No special type of wood is necessary for the spacers; you'll use them to obtain a rough level on your mortar.
- 2.** Lay out your brick pattern as you want it to look beside your walkway. Unless you're a professional mason, this is the best way to get the exact pattern you want. You don't have to lay out the entire walkway at once, but lay out enough to complete at least a 3-foot length of walk. You can lay out more as you go.

**3.** Cut a section of plywood to the dimension of the width of your walk. For a standard 3-foot residential walkway, you would cut a square of plywood that is 3 feet long and 3 feet wide.

### **Set the Bricks**

- 4.** Place one spacer on each side of your sidewalk at the start of your walk. The spacers serve as a rough level, helping you keep the mortar bed even.
- 5.** Mix mortar as directed on the bag and spread it out on the concrete between the wood spacers, creating a 3-foot "bed" of mortar about ½ inch high over the level of your walkway, using the spacers on each side as rough guides.
- 6.** Transfer the bricks, maintaining the same pattern, from beside the walkway to the mortar bed. Do about 3 feet at one time, working from side to side on the walkway.
- 7.** Set each brick as you place it by pushing it back and forth lightly. The bricks will sink about ¼ inch into the mortar bed, displacing some of the mortar between each brick.
- 8.** Complete a 3-foot area and then place the plywood square lightly on top of the bricks. Tap lightly over the entire surface of the plywood with a rubber mallet to level the bricks beneath. Remove the plywood and use a trowel to wipe away excess mortar that has seeped out on the edges of the walkway. Repeat with each 3-foot section of walkway.

### **Finish the Project**

- 9.** Spread fresh mortar over the bricks after the entire brick walkway is complete and the mortar bed is hard. Use the trowel to push the mortar evenly into the spaces between the bricks, wiping excess mortar off the top of the bricks as you go.
- 10.** Brush away dried mortar from the brick surface with a stiff-bristle brush, when the mortar is completely dry.
- 11.** Spray off the surface of the bricks and your walkway is ready for foot traffic.

## **How to Maintain your Brick Installation**

### **Cleaning Tips**

1. Use a garden hose with a spray nozzle attachment to wash laser engraved paving stones or tiles. Routine cleaning will keep the paving stones and tiles looking nice and will prevent dirt and grime from becoming embedded in the bricks and tiles. Fundraising Brick recommends that you clean your installation site two times per year at a minimum. This will help to prevent dirt, mold, and grime build up and will keep your installation site looking new.

2. Remove stubborn dirt or stains with a pressure washer. A pressure washer may be enough to clean the engraved brick pavers and tiles, allowing you to avoid harsh detergents or chemicals. Use hot water and a fan spray nozzle to ensure that you do not damage the surface of the paver or tile. DO NOT use the small direct nozzle, as it may damage the engraved surface, allowing more dirt and grime to become embedded into the laser engraved paver or tile. After you are finished washing the pavers, sweep the pavers or tiles with a broom.
3. If you are unable to remove dirt, grime, stains, excess mortar on the engraved brick or tile with the two methods listed above, you may use a general purpose chemical. Always perform a small test area before cleaning large areas.
  1. Recommended chemical for brick and tile cleaning: Sure Klean® 600 is a general purpose, concentrated acidic cleaner for brick, tile and concrete surfaces. Dissolves mortar smears and construction dirt quickly, leaving the masonry clean and uniform with no acid burning or streaking.
  2. Test an inconspicuous spot before using any cleaning products, as some types of pavers may be damaged by certain chemicals. To test the product, apply a small amount to a laser engraved paver or tile, then leave it on for a few minutes and the thoroughly rinse with water. If there is no damage or fading to the laser engraving or the actual brick or tile, you should safely be able to use the chemical to assist in cleaning the bricks or tiles.
  3. Apply the cleaner to your pavers or tile using a brush or broom. Avoid using a brush with any metal bristles, use nylon bristled brush for scrubbing. Allow the cleaner to set for 10 minutes or per the manufactures recommendations.
  4. Wash the laser engraved paving stones or tiles using a stiff scrub brush or broom. Scrub a small area at a time, until all the pavers or tiles have been cleaned.
  5. Rinse the pavers thoroughly with a garden hose. Allow them to dry.

Care during winter months:

Snow should be removed by mechanical means not with any type of de-icing chemicals. Power brushing is particularly good because there is little or no metal to paver contact.

If you use a snow blower make sure that the steel guide pads at the mouth of the snow blower are coated with rubber to reduce the possibility of damage when the guides hit and raised or pavers or tiles.

Shovels are fine to use for snow and ice removal. DO NOT use Ice scrapers they do damage laser engraved clay pavers and tiles.

Ice is best removed from laser engraved pavers and tiles by spreading sand on the surface of the pavement. Salts such as magnesium chloride, can be mixed with sand to speed melting. Calcium chloride causes deterioration over time.

# General Tile Installation Instructions

These are general guidelines only. Check with your tile installer for recommendations before laying tiles. Fundraising Brick is not liable for tile installation; these are only general recommendations.

## **\*SPECIAL NOTE\***

### **GLASS TILE INSTALLATION**

**USE A WHITE COLOR ONLY AND AN ACID FREE ADHESIVE TO INSTALL GLASS TILES. FOR ADDITIONAL DETAILS CONTACT A PROFESSIONAL GLASS TILE INSTALLATION COMPANY.**

**Note:** Directly bonding glass tiles to wood substrates is not recommended. All surfaces to receive tile shall be left clean and free of dust, oil, grease, paint, tar, wax, curing agent, primer, sealer, adhesive residue, form release agent or any other deleterious substance and debris which may prevent or reduce adhesion.

Glass tile expands and contracts more than ceramic and porcelain tile. This movement needs to be accommodated in the installation, particularly where temperature changes may occur. Be sure to use caulked joints on all inside corners where walls intersect. This recommendation is standard installation procedure though frequently ignored with ceramic tile. It is critical with glass tile installation. We recommend a minimum grout joint of 1/8 inch between tiles.

## **SETTING MATERIALS**

We recommend any high grade flexible mortar system (latex modified) as a setting material for glass tiles. When selecting the grout color, consider that the glass tiles are made of transparent glass and the color of grouting materials will be visible from the edges of each tile, white is the recommended color. This may affect the final appearance of the tile. To insure the correct grout color has been selected create a sample swatch and grout, allow to dry and evaluate before proceeding. Use only non-sanded grout with polymer or latex, and compliant with ANSI 118.6. If the installation requires larger grout joints where sanded grout is necessary, glass tiles should be face taped to protect the surface from scratching.

## **Individual Glass Tiles**

1. Mix setting materials according to manufacturers' instructions.
2. Use a 3/16" square-notched trowel to apply setting materials. Tiles up to 6" x 6" use a 1/4" x 1/4" square-notched trowel.
3. Additionally, each piece should be "back-buttered" with a thin, continuous layer of the setting material.

4. Press tile into the setting materials. Leaving a minimum of 1/8 inch space between each tile for grout.
5. After tile application, use a rubber float or equivalent tool, gently press the tile into the adhesive and flatten to insure complete contact. Do not push the tiles too deeply into the setting materials, as this will cause the setting materials to ooze up between the spaces in the tile.
6. Adjust tile for correct alignment and even spacing between. Do not allow setting material to dry or skin over before completing this process.

## **GENERAL INSTALLATION FOR ALL TILES**

- Allow setting materials sufficient time to set (see manufacturers' instructions).
- Clean all excess setting materials with a damp sponge or damp terry cloth towel. Always use clean cloths, preferably white, as some fabric dyes can stain the grout joint. Clean all excess setting materials that may have remained on the tile surface. Wipe away any haze that may have remained behind.
- After 24 hours, mix grout, following manufacturers' instructions.
- Grout openings between tiles.
- Clean all excess grout immediately with a damp sponge.
- Polish off any remaining haze with a dry cloth or towel.
- After grouting, protect area from light foot traffic and light water exposure for at least 72 hours. Protect area from heavy traffic and regular use for at least 7 days.

## **TILE CARE AND MAINTENANCE:**

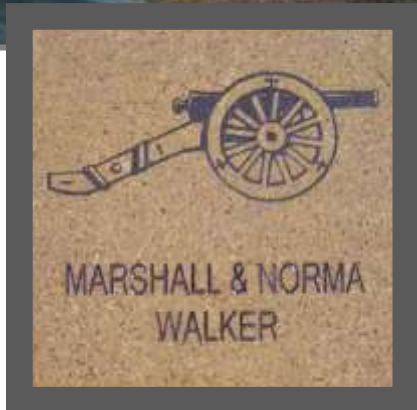

Clean the surface of glass tile with mild soap and warm water. Wipe surface completely dry with a clean, lint free soft cloth. For excessively dirty glass tile, use a non-abrasive cleaning compound recommended for glass or tile (such as Windex, ammonia and water, vinegar and water). Rinse according to the manufacturer's instruction.

# Photo Gallery

*Honoring our Heroes*

*Installation at  
Hutchinson, Kansas  
Soldiers and Sailors Memorial  
Raised \$30,000.00*

## *The Muny at Forest Park – St. Louis, Missouri*

*The Muny has raised nearly \$350,000.00 with their ongoing laser engraved brick fundraiser. They sell their 4X8 bricks for \$250.00 each and their 8X8 bricks for \$1000.00 each.*

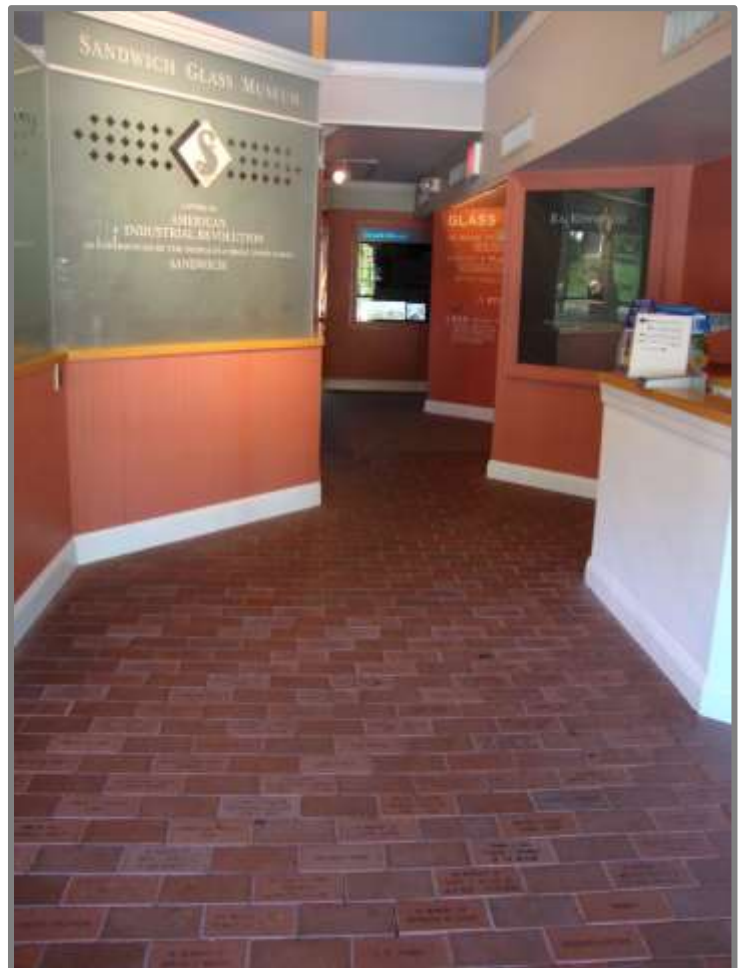

*Nearly 1,000 Muny lovers have been recognized for their contributions to The Muny with inscribed bricks. Some inscriptions are in memory of a family member, a loved one or a friend. Others send messages to The Muny or future audiences, like the ones that read:*

**"THANKS FOR THE FREE SEATS"  
and  
"THANK YOU FOR 50 WONDERFUL MUNY SUMMERS"**

## *The Sandwich Glass Museum – Sandwich, Massachusetts*

*Join this unique Museum and explore  
The world of glass. You can play a  
vital part in supporting the Museum,  
preserving the history of Sandwich  
and expand its educational programs.  
We invite you to join our nationwide  
and international family of members.  
Your purchase of a membership  
provides essential operating funds  
for the Museum. Patron members  
receive an engraved brick in your  
name to be placed in the  
Museum lobby*

*Remembrance Clock...For the Members by the Members  
Columbia Country Club, Blythewood, South Carolina  
Laser Engraved Brick Fundraiser*

*The concept for the Remembrance Clock and Fundraiser Engraved Brick project was an excellent opportunity to involve our members, recognize our loved ones and build a timeless treasure for Columbia Country Club, while providing an on-going way to honor special occasions in our lives with engraved bricks.*

*Thanks to the dedicated members of Columbia Country Club, their families and friends, we began our Remembrance Clock and Fundraiser Engraved Brick Project, "For the Members by the Members", and raised over \$25,000 to purchase the clock, the bricks and pay for all expenses.*

*The clock was purchased from Verdin Clock Company and the bricks were purchased through FundRaising Brick. The design for the beautiful base clock was created working with FundRaising Brick and the first installation of eighteen engraved bricks has been accomplished. "I have traveled all over the world and seen clocks of all shapes and sizes, but I have never seen one so beautiful as the clock at Columbia Country Club. The clock, the brick base and the setting is just breathtaking."*

*This Remembrance Clock project is a true "labor of love" and is an incredible honor for our loved ones. It is a timeless treasure and a valuable centerpiece for Columbia Country Club.*

*Our hope is that selling Fundraiser Brick engraved bricks will also generate funds to sustain the clocks future expenses and provide funds to assist with club projects. The engraved brick phase will keep our project dynamic well into the future as members recognize special events and people — like marriages, birthdays or a hole in one!*

*Remember, the clock is always ticking so spend your days making memories...because time steals everything but our memories; and Fundraiser Bricks are engraved to last a lifetime. The friendly, professional assistance provided by Jenny and Karen at Fundraiser Brick exemplifies customer service through and through.*

## ***Cesar Chavez Memorial – San Fernando California***

***The City of San Fernando has dedicated a memorial in memory of Cesar Chavez. The Memorial consist of engraved bricks, four separate art pieces, a fountain in the shape of the UFW Aztec-inspired eagle, 6 foot bronze sculpture of Cesar, sculpture of ten farm workers, and a 100 foot mural by local artist.***

## Lewis and Clark Expedition

### Lewis and Clark Dedication Hermann, Missouri River Front

*Student generated art work was collected from local schools in celebration of the Lewis and Clark Dedication. The winning drawings were inscribed in brick and placed along the river front. This was a donation to the community by Fundraising Brick LLC.*

## ***Fenton Heroes Memorial – River Chase Park Fenton, Missouri***

***Ongoing Fundraiser that has earned thousands of dollars***

*In the spring of 2004, the Mayor of Fenton, Missouri, Dennis J. Hancock and the members of the Park Board (Board Chair--Glen Scholle, members Jeff Bodi, Charles Jahneke, Mike Lucas, Steve Covault, Gregg Cleveland, Diana Biras and Nannette Clark), determined that their city should build a memorial to the victims of the terrorist attacks at the World Trade Center on September 11, 2001. It was also determined that the memorial would honor police, firefighters, EMS personnel and all veterans.*

***The Heroes Memorial includes:***

- *Hundreds of engraved brick pavers honoring the heroes involved in the lives of our Community.*
- *A granite globe that "floats" on a thin curtain of water and spins easily at the touch of a child's hand.*
- *A black granite wall honoring the victims of the September 11th attacks. Engraved in the granite are the locations of the attacks. In front of the wall is a sculpture symbolizing the "Twin Towers".*
- *Two black granite pilasters listing the names of area police, firefighters and military personnel killed in the line of duty.*
- *A beautifully landscaped stone planter wall containing plaques honoring veterans, police, firefighters and the victims of 9/11.*
- *Flagpoles sponsored by local organizations*
- *Granite benches and pillars.*

# *Maryland Fire Rescue Services Memorial Foundation, Inc.*

*Memorial Installation is Located one Block from the Governor's Mansion in Annapolis, Maryland*

*Fire Fighter Brick Array - 9 8X8 Bricks laser engraved for a 24" X 24" Installation*

# National Fallen Firefighters Memorial

*A grateful Nation honors its fallen fire service heroes at the National Fallen Firefighters Memorial Park located on the campus of the National Fire Academy in Emmetsburg, Maryland. The park is located about 90 minutes from Washington, DC, and Baltimore, Maryland.*

*At the heart of the park, the National Fallen Firefighters Monument is a striking stone monument encircled by plaques listing the names of all members of the fire service who have died in the line-of-duty since 1981. A brick Walk of Honor® connects the National Monument to the historic Memorial Chapel. At the far end of the park stands the 9/11 Memorial, To Lift A Nation. In 2011, a brick plaza and walkway were added in front of the sculpture.*

**Fontbonne University**

**Stevenson University**

# ***VFW Brick Installation***

***Flag Plaza at the VFW Home in Washington, Missouri***

***Fundraising efforts raised over \$25,000.00.***

***Walt Luthor, a former Navy Officer who advanced the idea of memorial bricks stated efforts are being made to place the home on the national register of historic places. The VFW home was built in 1860 and owned by the Busch Family***

## ***Monmouth Reform Temple, Tinton Falls, NJ***

*We use the bricks in a walkway from Monmouth Reform Temple's patio to a Meditation Garden where people can visit at their leisure and where we hold some outdoor summer Sabbath services.*

*If you want/need a close-up of one of the engraved bricks let me know and I will take one.*

*Monmouth Reform Temple, Tinton Falls, NJ, undertook installation of this 80 ft. by 4-5 ft. Brick Walkway fund raising project in 2001. As we received orders for engraved bricks they were ordered from Laser Light Technologies in 2001. Within this first year we had ordered 184 engraved bricks and continue to add more in small quantities as requests are received. We have been very pleased with the cost and quality of the bricks, the ability to order in small quantities and the timely deliveries provided.*

## ***Kellison Elementary School, Fenton Missouri Four Phase Installation Project***

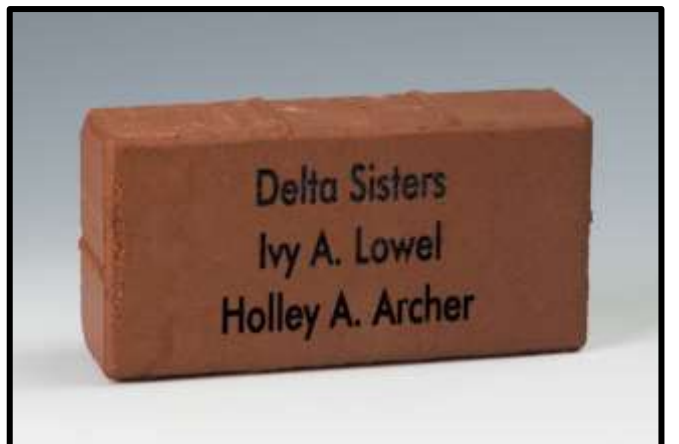

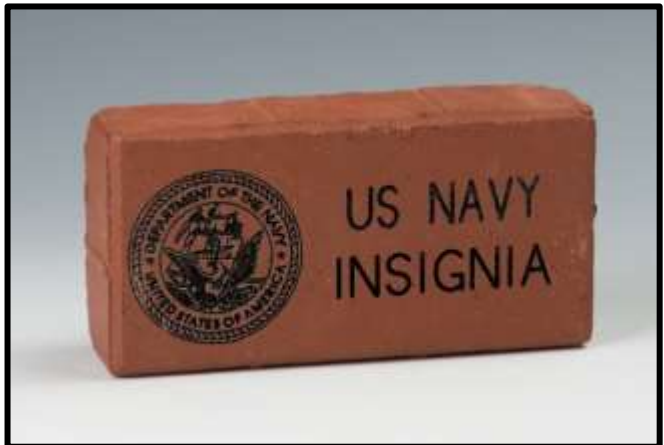

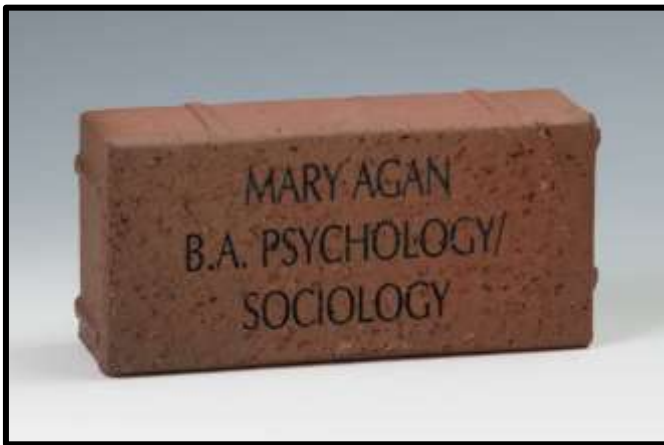

***The path photo is by our flag pole. This is our 3<sup>rd</sup> year where we have ran the campaign for a needed child in our school or community. We fundraise by selling the brick pavers and then we use the paver to complete our landscape for the school. The family gets the funds left over after we pay for the bricks. The school gets the nice landscape with the honor and memory pavers.***

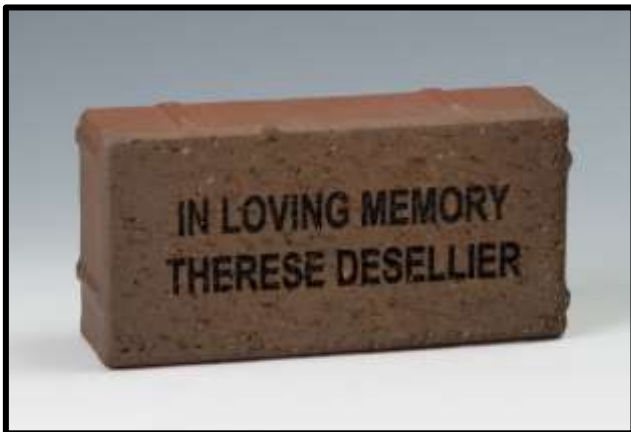

***We have another path to lay and then we will fill in and make it a semi-circle with mulch in between the paths. The district has donated the labor to set the pavers nicely in place. As you can see it has withstood weathering nicely***

PRODUCTS & SHIPPING.**

## Director of Engineering

Dear Fundraisers,

Fundraising Brick LLC is proud of the quality and durability of our brick laser engraving process called *laser vitrification*.

Laser vitrification is used to scribe lettering or logos on bricks of suitable composition. In this process, the heat of a laser beam melts the brick in the custom-programmed pattern, causing it to re-solidify as glass in a black, glossy finish that does not deteriorate, even under the most extreme weather conditions.

Our laser vitrification process was subjected to a simulated fifty-year weather resistance test by Industrial Testing Laboratories, an independent testing company. Samples of our laser engraved bricks were placed in three climate simulations: (1) hot and cold simulation of freeze-thaw cycling, (2) ultraviolet simulation of sun aging, and (3) simulation of coastal environments by salt spray exposure. Even under the most extreme weather conditions, the laser engraved bricks will stand the test of time, insuring that you will not have to replace your bricks because of faded marking.

A copy of the test results from Industrial Testing Laboratories is available. Please call Fundraising Brick LLC at 855-BRICKS4U for further details.

Sincerely,

David Bryan, Ph.D.

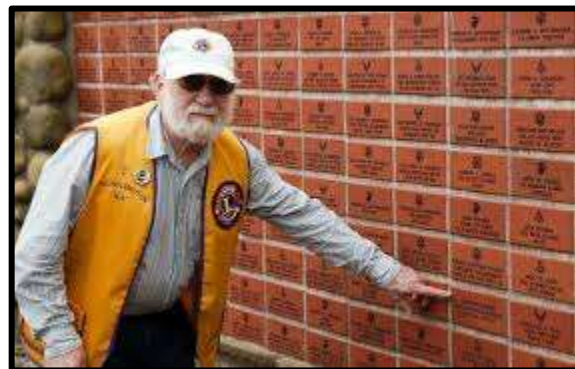

Director of Engineering
